Become a member of the Saarland University of Applied Sciences family. We are one of the most research-oriented universities of applied sciences in Germany with a strong entrepreneurial spirit. Thanks to our active university partnerships around the world and twelve Franco-German degree programs, we are both Francophile and internationally oriented. Our university currently has over 6,000 students and is located in the heart of Saarland's capital city, Saarbrücken. Enjoy the benefits of a dynamic and lively border region with an exceptionally high quality of life while helping us provide the next generation of specialists and managers with the best possible education and preparing them for the challenges of the future.

The School of Architecture and Civil Engineering has a vacancy for the following professorship effective October 1, 2027:

W2 professorship (m/f/d) for Design, Construction, and Extension

Reference Number 72

→ Your profile

We are seeking an architect (m/f/d) with outstanding skills and proven practical experience in design and construction. The professorship focuses on adaptive work within the existing built environment and context-sensitive extension, understood as a conceptual and structural engagement with the existing built fabric through contemporary and forward-looking methods, technologies, and materials.

As the faculty is looking to expand its research activities, additional expertise in applied and scientific research is expressly welcome. Practical experience in relevant fields that contribute to the faculty's further development will be given special consideration.

In addition, we are looking for:

- Sound scientific knowledge in the sought-after fields
- Outstanding scientific and teaching qualifications
- Several years of independent professional experience, gained nationally or internationally, in the focus areas
- A well-defined research profile that facilitates both independent and collaborative research projects
- Strong language skills in German and English
- Additional language skills in French and/or another foreign language are an advantage, as is proof of international contacts and experience

→ Your tasks

Within its integrated bachelor's and master's programs, the department teaches design strategies, structural principles, and methodologies for working with existing buildings, preparing students to address architectural and urban challenges with a reflective and contemporary approach.

In this context, you will primarily be responsible for:

- Teaching courses in the Architecture programs (bachelor's and master's)
- Active participation in teaching the basics
- Dedicated participation in furthering the faculty and the university
- Willingness to cooperate and work in an interdisciplinary manner across different fields of study
- Representing your subject area in teaching, research and academic development
- Offering courses in German and English
- On-site presence at the university in order to provide optimal support for students
